If a draft version of this form is released in your software, the print function must be disabled. If a draft version is filed, it will be returned to the taxpayer and a penalty may apply to you or your customer.

Provider forms are only accepted after approval. It is not acceptable for a taxpayer to print out a blank copy of the form and hand complete it. A hand completed version of a provider form will be sent back to the taxpayer and a penalty may apply to you or your customer. All forms must be original laser printed forms. **Photocopies are NOT acceptable.**

The following is the labeling and the description of the items to be included in the Scanband of this form. The beginning and ending data positions are included in one of the templates for this form. The field length is included in this key for each data position. Grid positioning given is from the first grid space and through the last grid space included in a data field. (Example 27/10 to 36/10 is 10 grid spaces). You should use this information to position the data on the returns. Do not use a grid overlay to determine the positions from a printed paper form. The field length specified assumes using a **Courier 12pt. font or OCR-A 12pt. font**, which are the required fonts. All data fields in the scanband should be right justified. All fields in the scanband must be filled. If the field is blank a "0" should be used for numeric field; and "N" for all alpha and alpha/numeric fields.

The money field in the scanband should not contain any commas, cents, decimals or other formatting information except for the negative signs (-) as a leading indicator for any negative amount. The amounts in the body of the return should contain commas. Pennies should always be rounded to whole dollars. No pennies or decimals should be anywhere on the return. Example -123,456 in the body of the form would appear a -123456 in the scanband.
