 - (4) If the application is based on proposed construction not completed at the time of application, the applicant must submit construction plans for the proposed building which will be the basis for the application investigation. These plans must, at a minimum, provide accurate measurements that allow the Department to determine the precise main entrance location in reference to the rest of the building;

If the survey shows that the nearest property boundary line is within 1,000 feet but over 500 feet away, the applicant must include approval of a waiver from the church, school or childcare center.
- (12) If construction is still under way at the time of application, information and statements provided in the application shall become conditions of the license if the application is granted, and failure to satisfy the conditions may be cause for revocation or denial of renewal. An updated survey must be submitted during renewal showing that the licensee meets all distance requirements at the time of renewal.

102 In addition to submitting the application form and the items described in Paragraph 102 of this rule, the Department will require the following to be submitted:

- (5) Any additional information that the Department requires to supplement provided information and determine eligibility.

103 The Department will review an application to determine if it is complete. An application will not be considered complete if the applicant does not provide all information required by the application form, the full application and license fees have not been paid, or all of the additional information required under these rules is not submitted. If items are missing, the Department will send notification to the applicant that the application has been rejected and provide a description of the needed information. The applicant will need to resubmit an amended application for a license if the application is rejected.

104 Once all required information is received and the fees have been paid, the Department will send notification to the applicant that it has received a completed application. Once the application has been deemed complete, the Department will investigate the application and issue a determination within thirty (30) days of receiving the completed application. Applications will be processed in the order in which a completed application is filed. Investigations will be initiated based on the order in which a complete application is filed; however, the duration of the investigation will depend upon the information provided by the applicant.

105 The applicant will be required to pay the \$15,000 application fee and \$25,000 license fee before the application can be considered complete. If the applicant is denied a license because its main entrance is within 1,500 feet of a licensed dispensary, both the \$15,000 application fee and the \$25,000 license fee will be refunded. If the license is denied for any other reason, including violation of any other distance restriction, the \$25,000 license fee will be refunded, but the \$15,000 application fee will not be refunded. The application fee and license fee must be paid by credit card or ACH debit through the licensing vendor selected for the Mississippi Medical Cannabis Program.

106 Department will make a determination as to whether to grant or deny a license within 30 days of receiving a completed application. If Department is unable to receive results of a background check for disqualifying felonies within those 30 days, it will grant a license to otherwise successful applicants. Thereafter, if Department receives results from the background checks that include a disqualifying felony, it will provide the licensee with the opportunity to divest itself of the individual with a disqualifying felony. If the licensee is unable to or refuses to do so within 10 days of notice, Department will revoke the subject license.

107 If a license is issued to an applicant that is still constructing the licensed premises, the applicant must complete construction and fulfill all obligations required by the Department

When two completed applications are received and the main points of entry for each are within 1,500 feet of the other, the first applicant to be issued a license will be controlling. The second applicant will not be eligible to receive a license for its applied location with the listed main point of entry.
- 102 All measurements shall be made using a straight line, point-to-point method. When a main point of entry constitutes an end point, measurement shall begin at the mid-point of the door if a single door; and the point where the doors meet for dual door entrances.
- 103 If the premises construction is complete at the time of application, the Department will investigate the application based on the completed construction when reviewing distance requirements. If the building construction is complete but there are planned changes to the main point of entry prior to opening, the Department will investigate the application based on the premises map or sketch included with the application. If the application is based on proposed building construction not completed at the time of application, the Department will investigate the application based on the survey and construction plans submitted with the application. The determination as to whether a license should be issued will be based on these respective documents. Therefore, any change to these documents or actual placement of a main point of entry which would have materially affected the decision of the Department to issue a license could subject the license to future revocation.

Chapter 4 Annual Renewal

- 100 Active licenses must be renewed on an annual basis. Licenses are valid for one year from the date of issuance. At the time of renewal the licensee must demonstrate continued compliance with all applicable licensing criteria.

Notification will be completed by mailing or e-mailing the renewal notice to the address listed by the licensee on its application or latest renewal, as applicable.
- 104 At the time of renewal, the licensee shall ensure that all material changes to the required plans have been communicated in writing to the Department.
- 105 The licensee shall submit proof, through a renewed local authorization certification form, that the licensee is still in compliance with all requisite local permits and licenses and is in good standing with the municipality or other local entity wherein the licensee's facility is located.

Such misconduct may result in a fine, suspension or revocation of the license depending upon the type of misconduct that occurs.
- 107 Licensees shall be accountable for any criminal or regulatory misconduct by non-employees when the Department finds that the licensee or licensee's employees knew or reasonably should have known about the non-employee misconduct and did not take any action to stop the misconduct. Such misconduct may result in a fine, suspension or revocation of the license depending upon the type of misconduct that occurs.

Chapter 18 Operating Hours

- 101 The operating plan shall state the hours ("normal business hours") during which it will:
- (1) Sell or transfer cannabis products, along with cannabis paraphernalia, on the licensed premises to individuals upon presentation of a card:
 - (2) Refuse to sell any item to any person; or

- 102 An individual will not be able to work at a dispensary until after he or she receives a work permit and completes eight (8) hours of continuing education relating to medical cannabis. Thereafter, it is the individual's responsibility to annually complete five (5) hours of continuing education relating to medical cannabis to maintain such certification. An individual is required to renew his or her permit every five (5) years.
- 103 If an individual does not complete the annual continuing education requirements, the Department may revoke the individual's work permit or suspend the work permit until such time as the education requirements are completed.
- 104 Each dispensary is required to create an identification badge for its employees. This badge will be conspicuously worn by employees at all times that they are on the licensed premises.

Chapter 20 Sales Limits

- 100 A dispensary may not sell any combination of cannabis products to a resident or non-resident cardholder within one week that results in the cardholder receiving greater than six (6) MMCEU's. This calculation is based on the total amount of cannabis products received by the individual from all dispensaries during that week, beginning on Monday morning and ending on Sunday night.

- 101 A resident cardholder may not receive more than twenty-four (24) MMCEU's during any rolling thirty-day period from a dispensary or a combination of dispensaries. A non-resident cardholder may not receive more than twelve (12) MMCEU's from a dispensary or a combination of dispensaries during any rolling fifteen-day period. "Rolling" shall be calculated by reviewing the previous twenty-nine day or fourteen-day period, as applicable.
- 102 A cardholder's patient card may indicate that the patient is restricted to receiving an MMCEU amount less than the amounts stated in Paragraphs 100 and 101 above. It may also indicate that the patient is restricted to receiving medical cannabis products in certain forms. A dispensary is required to restrict its sales to any such patient to match the limitations set forth on the patient card.
- 103 A dispensary is required to report to the Department the identity of any individual who communicates the intent to divert cannabis products to individuals who do not have cards, across state lines or to be engaging in the unlicensed sale of cannabis. Such communication must be done as soon as reasonably possible.
